Coronavirus and the law: what has been done differently in Wales?	As the decision to impose widespread restrictions was taken on a UK-wide basis, most of the provisions are the same or very similar across the UK. However, there are differences in approach, some of which are significant. Extra £40m to support adult social care in Wales	Additional guidance on this funding has just been issued to representatives of local authorities, and copied to representatives of adult social care providers. It covers the situation where local authorities wish to meet the additional costs adult providers are incurring as a result of Covid-19 by means of a supplement. It also provides clarification in relation to healthcare. I copy of this and the previous guidance issued is attached. This funding is to help ensure local authorities can address the additional costs resulting from Covid-19 that adult social care providers are experiencing. This will include additional expenditure providers that are incurring above that normally commissioned on items such as increased staff costs, more agency staff, or greater infection control. It is **ring-fenced for adult social care** and included in the Covid-19 Local Government Hardship Fund. established recently. It is to help ensure adult social care providers can maintain their care provision and be able to respond to any additional demand for care which arises. This allocation will be closely monitored to ensure it remains able to do this.
