Adult N died by suicide at aged 20 years old. At the time of her death, she was living in the CTM region, however she was previously a Child Looked After by an English Local Authority. Prior to her death, she was subjected to serious domestic abuse, abused substances, self-harmed and had ongoing suicidal thoughts. It was agreed that the case met the criteria for an extended Adult Practice Review.

EXTENDED ADULT PRACTICE REVIEW ADULT N

Adult N moved back to this area when she was 16 and reconnected with her birth mother. She had previously been detained under the Mental Health Act, she had a diagnosis of mixed disorder of conduct and emotions but refused therapeutic input. As an adult she was involved in anti-social behaviour and was a victim of domestic abuse. She was deemed to have capacity and continued to refuse interventions and support.

RECOMMENDATIONS

There are 5 recommendations for improvement from this review. Each recommendation is linked to the learning points identified in stages 4-6 below. These form an action plan that will be monitored by the Regional Safeguarding Board.

All Safeguarding Board partner agencies are encouraged to share the learning from this review.

METHODOLOGY

BACKGROUND

The Reviewers met Adult N's birth mother who described her as being at her best when she was with her first boyfriend who tragically died. This had a significant impact on Adult N's mental wellbeing.

A Learning Event was held with representatives from agencies who had worked with Adult N. A timeline of significant events was shared, and learning was identified.

PRACTICE AND ORGANISATIONAL LEARNING

- 4. Transition to Adulthood transition arrangements should be considered at key points within a young person's journey
- 5: The importance of evidence practice supporting step down from care delivery should always be adopted to ensure a consistent approach

PRACTICE AND ORGANISATIONAL LEARNING

- 2. Transfer of responsibilities under the Mental **Health Act** – practitioners need to familiarise themselves with the Act when supporting young people who have been detained
- 3. The Impact of ACES, sudden bereavement, and loss - could have been considered via a formulation meeting to consider appropriate support for Adult N.

PRACTICE AND ORGANISATIONAL LEARNING

1. Support mechanisms for those placed in the local authority from outside - cross border issues can be a challenge, there should be discussions about the support that can be provided locally, and consideration given to commissioning local services which can continue into adulthood.
